

Tuesday, May 11, 2010

Dear Parents,

Because academic success is a priority at St. Catherine of Siena, we, as educators, work very hard during the school year to ensure that your child has mastered the essential skills. Therefore, the students will be required to complete a math enrichment packet (entering 1st thru 7th) and reading activities (entering PK thru 7th). The purpose of the enrichment is to reinforce the skills your child has learned this year and to maintain his/her academic growth for the next grade. In addition, in order to meet the challenges of the school's curriculum, we feel this reading and math enrichment is necessary.

The summer reading list and activities as well as the math packet will be posted on the school website www.scsgators.org in June. Your child is expected to complete and return both the math packet and assigned reading activities by **Friday, August 13.**

The math packet will be used as study material for a quiz that will be given the second week of school. Students are expected to choose two reading activities, and these activities will be graded. Parental supervision is encouraged, especially for the students in grades Kindergarten thru fourth grade.

Please fill in and sign the form below and return to school by **Friday, May 14.**

Thank you,

Frances Dee Tarantino
Principal

Please keep the top portion.

I understand that I can access the summer reading activities and math packet on the SCS website in June. Both the reading (entering PK thru 7th) and math enrichment (entering 1st thru 7th) must be completed and returned to school by **Friday, August 13.** I understand that my child will be tested on the math skills (entering 1st thru 7th) after the first week of school, and the reading activities will be graded (entering 1st thru 7th).
